

Classic Slime

Ages 6–12 · 20 min · Small group

Learning intention

This experience supports children to experiment with materials by following a method and observing how a mixture changes.

You'll need

- ½ cup PVA glue
- ½ cup water
- Food colouring
- 1 tbsp saline solution
- ½ tsp baking soda
- A bowl and spoon

How to do it

1. Mix the glue and water together in a bowl.
2. Add a few drops of food colouring and the baking soda, and stir.
3. Slowly add the saline solution, stirring as the mixture begins to thicken.
4. Knead with hands until it pulls away from the bowl and turns stretchy.

Framework links

MTOP

- **4.2** Children and young people develop a range of learning and thinking skills and processes such as problem solving, inquiry, experimentation, hypothesising, researching and investigating
- **4.4** Children and young people resource their own learning through connecting with people, place, technologies and natural and processed materials

NQS

- **2.1.2** Health practices and procedures - Effective illness and injury management and hygiene practices are promoted and implemented.
